

## RANGE 100

# SEALER BY CONDUCTION TE 100

PHOTO NON CONTRACTUELLE

The **TE 100** is a manual sealer by conduction designed for small series. Reliable, it is a good alternative for companies that want to seal their products without investing in an expensive machine.

Quick and easy to implement, it is very simple to use and does not require any air compressed supply. The operator places the lid on the jar, put the jar under the sealing heat and applies the sealing pressure during the time he decides. This easiness allows its use by a non-specialized manpower.

### Characteristics :

Dimensions : 200 x 350 x 650 mm

Electric power : 300 W

Standard diameters of the sealing pieces : 40-150mm

Weight : 13 kg

Voltage : 220 V monophasé

### Packaging dimensions (standard model) :

Diameter : <150 mm

Height : < 250mm
